

CSC173 Formal Models and Computation Project 4 Submission Form

Complete this form using a PDF viewer/reader, save it, and submit it with your code on BlackBoard.

Last name: First name: NetID:

File containing your `main` function:

Did you use “`-std=c11 -Wall -Werror`”?

Check one: Yes ☒ No ☐ I don't know ☐

Does your code have a clean report from `valgrind`?

Check one: Yes ☐ No ☐ I don't know ☒

Part 1

Name of file containing data structures for relations (structs, hashtables, etc.):

Name of file containing your implementation of the basic single-relation operations on relations (*insert*, *delete*, and *lookup*):

Name of the file containing the code for the required operations of Part 1:

Does your program print the database after creating it? Yes ☒

Does your program print what operation is being performed and then print the results or the affected table per the project description? Yes ☒

Continues on next page...

Part 2

Function for first required query (filename and function name):

database.c, findGoalsPartA()

Function for second required query (filename and function name):

database.c, findGoalsPartB()

Part 3

Name of file containing your implementation of the Relational Algebra operations:

database.c

Do your implementations take relations as arguments and produce a relation as their result? Yes ☒

Name of the file containing the code to demonstrate these on the required examples:

database.c

Put any other comments and helpful descriptions in your README.
